Business/Profession: \_\_\_\_\_

As an alumnus of School District 73(24), I would like to express how important and critical being involved in High School Athletics was to me. The value of school programs, such as Athletics, is difficult to measure on any scale, but the worth of these programs is truly immeasurable. Having our students stay involved in healthy choices is very critical to their development as productive, self-assured, enthusiastic people.

I have chosen to make my home in Kamloops and to pursue my livelihood here. I am hoping that my family, and all children, will have the same opportunities that the Public School System provided me.

The 'proposal' that will be presented to the School Board , which offers a way to support and maintain our School Athletic Programs, is an extremely progressive and positive approach to meeting the financial needs that exists today.

As a member of the Kamloops' Business Community, I sincerely believe that offering the opportunity to help students throughout our district to people like myself, and to a variety of Community-Minded Businesses, is extremely encouraging and will be well-received.

I endorse the aforementioned proposal and strongly encourage the School Board to give this proposal an opportunity to succeed on behalf of all present and future students in our District.

Respectfully,
